During the starting period of the internship session students were trained with basic I/O devices interfacing programs followed by Hands-on session. After that students learnt Python programming from basics and trained them to write the programs by their own efforts and perform the debugging operation during execution in order to obtain the results,

During the last week of internship students completed assigned mini projects and after successful completion of the internship, the certificates were distributed.

3	Design a Doglegged staircase for a building in which the vertical distance between floors is 3.6m the stair hall measures 3 x 6m. Take live load on stairs is 4 kN/m ² . The flights are supported on 230mm walls at the ends of outer edges so that its span in the direction of going. Adopt M ₂₀ concrete and Fe 415 steel.	10	3	L4

Introduction

Before the Era of Internet

- If you wanted to sell things to the public, you needed a storefront
- Increased cost in real estate, maintenance and Shrinkage
- Prohibitive cost to entry
- You could have hundreds of millions of storefronts worldwide?
 - Without real estate
 - Without fixtures
 - Without maintenance
 - Without shrinkage
 - With [relatively] zero cost to entry

The Internet has changed everything

About Virtual Lab

Physical distances and the limited availability of resources often put restrictions on conducting experiments especially when they involve sophisticated instruments. Virtual Labs have been designed to provide remote access to labs in various disciplines of Science and Engineering.

These Virtual Labs cater to students at the undergraduate level, post graduate level as well as to research scholars. Virtual Labs enable the students to learn at their own pace and enthruse them to conduct experiments. Virtual Labs also provide a complete learning management system where the students can avail various tools for learning, including additional web-resources, video-lectures, animated-demonstrations & self-evaluation.

Objectives of the Workshop

1. To understand the concept of Virtual Labs developed by all participating institutes for remote experimentation.
2. To gain hands-on experience on Virtual Labs related to Electronics and Communication Engineering, Computer Science and Engineering, Mechanical Engineering, Civil Engineering, Electrical & Electronics Engineering and Applied Sciences.

ABOUT VIRTUAL LAB

Virtual Lab is an initiative of Ministry of Human Resource Development (MHRD) initiative under the National Mission on Education through ICT.

It started with the vision of *"To enrich the learning experience through experiential learning of science, engineering and technology in a virtual learning environment at preferred pace, place and period (time)."*

Physical distances and the limited availability of resources often put restrictions on conducting experiments especially when they involve sophisticated instruments. Virtual Labs have been designed to provide remote access to labs in various disciplines of Science and Engineering.

These Virtual Labs cater to students at the undergraduate level, post graduate level as well as to research scholars. Virtual Labs enable the students to learn at their own pace and entuse them to conduct experiments. Virtual Labs also provide a complete learning management system where the students can avail various tools for learning, including additional web-resources, video-lectures, animated-demonstrations and self-evaluation.

The Objectives of Virtual Labs are:

- Setup state of art virtual experimentation facilities (simulation) in selected areas of engineering & science
- Setup state of art experimentation facility in selected areas of Engineering and Science education which can be used both through remote access and on site experimental work
- Make these facilities available to all the educational institutions and students 24 X 7

Salient features

- Virtual Labs will provide the students to understand the Modelling process of a real-world system into an approximate version.
- Virtual labs will allow the students to Remotely trigger an experiment in an actual lab and get the result of the experiment through the computer interface.
- Virtual Labs are more realistic way of learning the subjects as it provides the technical input through audio and video streaming of an actual lab experiment and equipment.

About ATME

ATMECE, an ISO 9001-2015 certified Institute, is founded by a group of likeminded technocrats in 2010. The Campus is spread over 20 acres of green area with state of the art laboratories, a cluster of seminar halls & auditorium with all modern gadgets, Library, central computing facility etc. ATME Mysuru, not only offers facilities for the students to have overall growth, vision for the development and accountability for the future, also it provides highly excellent and dedicated faculties to cater the needs of the students.

Today, ATME is considered as one of the best Engineering Colleges in Mysuru, which remains on the top by the academic performance and also by the significant achievements of the students at the University level.

ATME College of Engineering is accredited by NBA for Civil Engineering, Electronics & Communication Engineering, Electrical and Electronics Engineering & Mechanical Engineering Courses for the academic year 2019-20 to 2021-22.

ATME a Nodal Centre of Virtual Lab NITK Surathkal.

ATME College of Engineering is recognised as a nodal centre of Virtual Lab NIT-Karnataka, Surathkal. Being a Nodal Centre under the guidance of NIT-K, Surathkal, ATME College of Engineering can organise training sessions for students and faculty members on Virtual labs.

Also by being a Nodal Center, ATME College of Engineering can organize workshops as an outreach activity of Virtual Labs. Faculty members and students from nearby institutes may also be invited to attend the workshop or training programme.

One-Day Workshop on VIRTUAL LAB

As an outreach activity of Virtual Labs, ATME College of Engineering has organised one-day workshop on **VIRTUAL LABS** on **26th October 2019**.

In consultation with NITK-Surathkal, the one-day workshop was split into two sessions.

Session-I: 10.00 a.m. to 12.30 p.m. for Faculties of Various Engineering Disciplines.

Session-II: 2.00 p.m. to 4.30 p.m. for Students of various Engineering Disciplines.

Session –I:

- Registration for the participants started at 9.30 a.m at the venue: Computer Lab-I, Admin Block. 25 Faculties from various Engineering Colleges and 60 faculties from ATMECE were registered for the Workshop.
- The program is inaugurated by Dr. Basavaraj L, Principal, ATMECE and the resource persons for the Workshop Mr. Nishan B Shetty and Mr. Aquib A Nadaf, NIT-K, Surathkal were the chief guests.
- In his Inaugural address Dr. Basavaraj L. appreciated the efforts taken by all the participating Institutes in developing Virtual Lab under one roof. Also he opined that, the virtual Lab will help the students in better understanding of the topics learnt and experiments conduct in the laboratories.
- Later the session was taken over by the resource persons. At the beginning the resource persons briefed about the concept about the virtual labs and the advantage of virtual lab.
- Since the faculties of various engineering disciplines were participated in the workshop, the mechanical and civil engineering labs were discussed first. Later in the session circuit branches like Electrical, Electronics and Computer Science Engineering labs were discussed.
- Also the faculties are allowed to use Virtual Lab Tour and conducted several experiments on their own. The doubts upon the using of Virtual labs were clarified by the resource person.
- At the end of the first session, NIT-K RT-Lab (Remote Trigger Lab) is also been demonstrated.
- Valedictory function was organised after the session got over. Principal Dr. I. Basavaraj felicitated the resource persons. Certificates to participants were distributed.
- Mr. Thejkumar J, Nodal Centre Coordinator, Virtual Lab presented the vote of thanks.

Session –II:

- Session-II is resumed after the lunch break and started at 2.00 p.m.
- The second session was meant for the Technical Staffs and for the students of various engineering streams.
- The resource persons, briefed about the importance and advantages of virtual labs and the benefit the students can get by using virtual labs.
- The session was started with theoretical inputs and students were allowed to use virtual lab tour in the systems.
- Students carried out several experiments of their interests and domain specialization.
- Also RT lab demonstration was given at the end of the session.
- Certificates were distributed to the participated staffs and students and Workshop is concluded at 4.30 p.m

Good

I think Few labs are still under development as simulation was not working for few experiments for example turbines under fluid mechanics lab

Some of the experiment is under construction, need network, DBMS, & web lab etc

Thanks for organising such a useful workshop. Please organise more such workshops.

11. Many of the experiments are under construction, hence could not make use of the workshop completely.
12. Suggested to conduct such kind of workshops which explores the teaching fraternity to the new, modern ways and techniques of teaching and learning.
13. If it was conducted for individual stream, the information would have been more elaborated.
14. More labs need to be develop and feel more colleges need to participate in developing VIRTUAL LAB.
15. Concrete laboratory development would be beneficial for civil engineering.
16. Thanks for the initiative taken by the organising committee.
17. Good job
18. The workshop is very useful and it will help the students demonstrate experiment virtually. Few experiments were found still under construction. These experiments have to be identified and addressed with necessary actions by the concerned institution
